

# MELECTRO FREQUENCY LASER

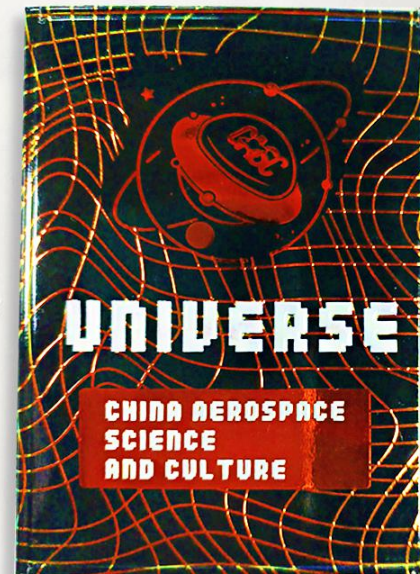

## 电频镭射

镭射元素一直深受年轻人追捧，在不同光的折射下形成不同的绚烂颜色，具有亮丽的金属光泽，粉红蓝紫色色彩的糅合像是低饱和的彩虹一样，所以也独称独角兽之色。高周工艺的组合，形成凹凸肌理，其视觉效果、立体感更强，带来的未来感知和层次感是这款设计的一大亮点。

Laser elements have been deeply sought after by young people, under the refraction of different light to form different gorgeous colors, with bright metallic luster, pink, blue and purple color mixture like a low saturation rainbow, so it is also called the color of the unicorn. The combination of high-week process forms concave and convex texture, which has stronger visual effect and three-dimensional sense, and the sense of future and hierarchy brought by it is a highlight of this design.
